

**9.2 TOWN OF BARTON**

This section presents the jurisdictional annex for the Town of Barton.

**A.) HAZARD MITIGATION PLAN POINT OF CONTACT**

| Primary Point of Contact  | Alternate Point of Contact   |
|---|--|
| Name: Leon Cary, Supervisor<br>Address<br>Phone Number: 607-343-2261 x2<br>Email address: barton.code@cyber-quest | Name: William Hotchkiss, Code Officer<br>Address<br>Phone Number: 607-343-5571<br>Email address: barton.code@cyber-quest |

**B.) PROFILE**

**Population**

8,858 (estimated 2010 U.S. Census)

**Location**

The Town of Barton is located in Tioga County, New York. The town situated between the Susquehanna River and the Chemung River and lies in the southwestern corner of Tioga County. The town consists of 59.63 square miles and is bordered Bradford County, Pennsylvania to the south, Chemung County to the west, the Town of Spencer to the north, and the Town of Tioga and Nichols to the east<sup>1</sup>.

The Town of Barton includes the Village of Waverly and the hamlets of Barton and Lockwood, as part of the Halsey Valley. The Southern Tier Expressway (New York State Route 17) passes across the town next to the Susquehanna River. New York State Route 17C also follows the river, but on the north side. New York State Route 34 is a north-south highway that intersects NY-17C at Waverly.

**Brief History**

The Town of Barton was established in 1824 but the region was already settled in 1796 when John Shepard bought 1,000 acres (4.0 km<sup>2</sup>) by the current location of Waverly. It is reported that the town was named after Belva Lockwood of Royalton NY (near Lockport), one of the first female lawyers in the country, the first woman to argue a case before the Supreme Court and the first woman to be on an official ballot running for president of the US in 1884 and 1888.

The first church built in the town in 1833 was the Emory Chapel named for John Emory, a Methodist Bishop. It is the second oldest church in the county and still stands today, guarding the graves of many of the early settlers<sup>2</sup>.

**Governing Body Format**

The town is governed by a supervisor and four council members.

### Growth/Development Trends

The following table summarizes major residential/commercial development and major infrastructure development that are identified for the next five (5) years in the municipality. Refer to the map in section I.) of this annex which illustrates the hazard areas along with the location of potential new development.

| New Development/Potential Development in Municipality |                                  |                      |                           |               |                   |                     |
|---|----------------------------------|----------------------|---------------------------|---------------|-------------------|---------------------|
| Property Name   | Type (Residential or Commercial) | Number of Structures | Address                   | Block and Lot | Known Hazard Zone | Description/ Status |
| Wilcox Estate   | Residential                      | 37 Homes proposed    | Circle Drive, Waverly, NY |               | None              |                     |

### C.) NATURAL HAZARD EVENT HISTORY SINCE 2000

Tioga County has a history of natural hazard events as detailed in Volume I, Section 5 of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events affecting the County and its municipalities. Below is presented a summary of events dating from the year 2000 to indicate the range and impact of natural hazard events in this community. Specific damages have been indicated if available from reference or local sources. For details of events prior to 2000, refer to Volume I, Section 5 of this plan.

| Type of Event               | FEMA Disaster # (if applicable) | County Designated? | Date                         | Approximate Damage Assessment   |
|-----------------------------|---------------------------------|--------------------|------------------------------|---|
| Severe Storms / Flash Flood | DR-1335                         | Yes                | May 3 – August 12, 2000      | \$1.25 M in property damages County-wide.   |
| Wind                        | N/A                             | N/A                | December 12, 2000            | Over \$64 K in property damage County-wide.   |
| Drought                     | N/A                             | N/A                | November 2001 – January 2002 | Three month duration with the lowest PDSI of -3.28 in December.   |
| Tornado F1                  | N/A                             | N/A                | May 31, 2002                 | There were seven injuries and \$600 K in property damage County-wide.   |
| Snowstorm                   | EM-3173                         | Yes                | December 25, 2002            | Snowfall totals in Tioga County ranged from 8.3 to 10.3.  |
| Snowstorm                   | EM-3173                         | Yes                | January 2-4, 2003            | \$475 K in property damage County-wide.   |
| Snowstorm                   | EM-3184                         | No                 | February 16-17, 2003         | Snowfall totals in Tioga County ranged from 9.5 to 15 inches. The County had over \$152 K in property damage. |
| Severe Storm                | N/A                             | N/A                | July 21, 2003                | Approximately \$50 K in property damage County-wide.  |
| Wind                        | N/A                             | N/A                | September 19, 2003           | Approximately \$50 K in property damage County-wide.  |
| Wind                        | N/A                             | N/A                | October 15, 2003             | Over \$58 K in property damage County-wide.   |
| Wind                        | N/A                             | N/A                | November 13, 2003            | Over \$52 K in property damage County-wide.   |

**SECTION 9.2: TOWN OF BARTON**

| Type of Event              | FEMA Disaster # (if applicable) | County Designated? | Date                           | Approximate Damage Assessment   |
|----------------------------|---------------------------------|--------------------|--------------------------------|---|
| Flood                      | N/A                             | N/A                | March 1, 2004                  | \$40 K in property damages County-wide.   |
| Flash Flood                | N/A                             | N/A                | July 7, 2004                   | The Town of Spencer had \$150 K in property damages.  |
| Remnants of Hurricane Ivan | DR-1565                         | Yes                | September 16-18, 2004          | Approximately \$1M in property damage County-wide.  |
| Flash Flood                | N/A                             | N/A                | March 28, 2005                 | Approximately \$70K in property damage County-wide.   |
| Severe Storms and Flooding | DR-1589                         | Yes                | April 2-4, 2005                | Approximately \$500K in property damage County-wide.  |
| Drought                    | N/A                             | N/A                | Summer 2005                    | Not available.  |
| Severe Storm               | N/A                             | N/A                | June 6, 2005                   | Approximately \$50 K in property damage County-wide.  |
| Flash Flood                | N/A                             | N/A                | June 10, 2005                  | Approximately \$20K in property damage County-wide.   |
| Flood                      | N/A                             | N/A                | October 25, 2005               | The Town of Waverly had \$20 K in property damages from the flooding event.   |
| Flood                      | N/A                             | N/A                | November 30 – December 1, 2005 | The Town of Waverly had \$25 K in property damages from the flooding event.   |
| Flood                      | N/A                             | N/A                | January 18, 2006               | Heavy rainfall caused minor flooding in Tioga County. The Town of Barton had \$10 K in property damages from the flooding event.  |
| Severe Storm and Flooding  | DR-1650                         | Yes                | June 26-30, 2006               | Over \$105M in property damage County-wide. A total of 5,000 homes were affected, with 500 homes damaged and 10 destroyed. Hardest hit areas were Tioga, Campville, Owego, Nichols, Barton and Apalachin. |
| Flash Flood                | DR-1670                         | Yes                | November 16-17, 2006           | Approximately \$35 K in property damages County-wide.   |
| Severe Winter Storm        | N/A                             | N/A                | February 13-14, 2007           | Snowfall totals in Tioga County ranged from 12 to 18 inches.  |
| Riverine Flood             | N/A                             | N/A                | March 15-16, 2007              | The Town of Barton had approximately \$5 K in property damage.  |
| Riverine Flood             | N/A                             | N/A                | March 25-30, 2007              | Not available.  |
| Drought                    | N/A                             | N/A                | October – November 2007        | Not available.  |
| Winter Weather             | N/A                             | N/A                | November 17, 2007              | Not available.  |
| Heavy Snow                 | N/A                             | N/A                | December 13, 2007              | Not available.  |
| Tornado                    | N/A                             | N/A                | May 16, 2009                   | Approximately \$10 K in property damage County-wide.  |
| Flash Flooding             | N/A                             | N/A                | September 30 –                 | Approximately \$75 K in property  |

| Type of Event                               | FEMA Disaster # (if applicable) | County Designated? | Date                 | Approximate Damage Assessment                                 |
|---|---------------------------------|--------------------|----------------------|---|
|   |                                 |                    | October 1, 2010      | damage County-wide.   |
| Heavy Snow                                  | N/A                             | N/A                | March 6-7, 2011      | In Tioga County, snowfall totals ranged from 13 to 18 inches. |
| Severe Storm, Flooding, Straight-Line Winds | DR-1993                         | Yes                | April 27-28, 2011    | Approximately \$3 M in property damages County-wide.          |
| Severe Storms                               | N/A                             | N/A                | May 26, 2011         | Approximately \$45 K in property damage County-wide.          |
| Heat Wave                                   | N/A                             | N/A                | July 21-23, 2011     | A record high of 100°F occurred.                              |
| Remnants of Tropical Storm Lee              | DR-4031                         | Yes                | September 7-12, 2011 | Over \$477 M in property damage County-wide.                  |

Note: N/A = Not applicable

**D.) NATURAL HAZARD RISK/VULNERABILITY RISK RANKING**

| Rank # | Hazard type         | Estimate of Potential Dollar Losses to Structures Vulnerable to the Hazard <sup>a</sup> | Probability of Occurrence | Risk Ranking Score (Probability x Impact) | Hazard Ranking <sup>b</sup> |
|--------|---------------------|---|---------------------------|---|-----------------------------|
| 5      | Drought             | Not available   | Frequent                  | 18  | Low                         |
| 4      | Earthquake          | 500-Year MRP: \$68,694<br>2,500-Year MRP: \$757,501<br>Annualized Loss: \$760           | Occasional                | 20  | Low                         |
| 1      | Flood               | 1% Annual Chance: \$191,092,000<br>0.2% Annual Chance: \$197,700,000                    | Frequent                  | 45  | High                        |
| 3      | Severe Storm        | 100-Year MRP: \$0<br>500-Year MRP: \$24,791<br>Annualized Loss: \$656                   | Frequent                  | 30  | Medium                      |
| 2      | Severe Winter Storm | 1% of GBS: \$2,414,040<br>5% of GBS: \$12,070,200                                       | Frequent                  | 39  | High                        |

- <sup>a</sup>. Building damage ratio estimates based on FEMA 386-2 (August 2001)
- <sup>b</sup>. High = Total hazard priority risk ranking score of 38 and above  
Medium = Total hazard priority risk ranking of 21-37  
Low = Total hazard risk ranking 20 or below
- <sup>c</sup>. The valuation of general building stock and loss estimates was based on the default general building stock database provided in HAZUS-MH 2.0 (RSMMeans 2006).
- <sup>d</sup>. Loss estimates are structural values only; does not include the value of contents.
- <sup>e</sup>. Loss estimates represent both structure and contents.
- <sup>f</sup>. The HAZUS-MH earthquake model results are reported by Census Tract.

**E.) CAPABILITY ASSESSMENT**

This section identifies the following capabilities of the local jurisdiction:

- Legal and regulatory capability
- Administrative and technical capability
- Fiscal capability
- Community classification.

The town indicates that it has limited planning, regulatory, administrative, technical, fiscal, and community political capability with a moderately willing political capability to enact policies or programs to reduce hazard vulnerabilities in the community.

## E.1) Legal and Regulatory Capability

| Regulatory Tools<br>(Codes, Ordinances., Plans)                                  | Do you<br>have this?<br>(Y or N) | Enforcement<br>Authority | Code Citation<br>(Section, Paragraph, Page<br>Number, Date of adoption) |
|--|----------------------------------|--------------------------|---|

**E.2) Administrative and Technical Capability**

| Staff/ Personnel Resources   | Available (Y or N) | Department/ Agency/ Position    |
|--|--------------------|---------------------------------|
| 1) Planner(s) or Engineer(s) with knowledge of land development and land management practices                  | N                  |                                 |
| 2) Engineer(s) or Professional(s) trained in construction practices related to buildings and/or infrastructure | N                  |                                 |
| 3) Planners or engineers with an understanding of natural hazards  | Y                  | SWCD                            |
| 4) NFIP Floodplain Administrator   | Y                  | William Hotchkiss, Code Officer |
| 5) Surveyor(s)   | Y                  | William & Edsell (contract)     |
| 6) Personnel skilled or trained in "GIS" applications  | N                  |                                 |
| 7) Scientist familiar with natural hazards   | Y                  | Code Officer                    |
| 8) Emergency Manager   | N                  |                                 |
| 9) Grant Writer(s)   | N                  |                                 |
| 10) Staff with expertise or training in benefit/cost analysis  | N                  |                                 |

**E.3) Fiscal Capability**

| Financial Resources  | Accessible or Eligible to use (Yes/No/Don't know) |
|--|---|
| 1) Community Development Block Grants (CDBG)                         | Yes   |
| 2) Capital Improvements Project Funding                              | Yes   |
| 3) Authority to Levy Taxes for specific purposes                     | Yes   |
| 4) User fees for water, sewer, gas or electric service               | Yes   |
| 5) Impact Fees for homebuyers or developers of new development/homes | Yes – Not Used                                    |
| 6) Incur debt through general obligation bonds                       | Yes- Not Used                                     |
| 7) Incur debt through special tax bonds                              | Yes- Not Used                                     |
| 8) Incur debt through private activity bonds                         | No  |
| 9) Withhold public expenditures in hazard-prone areas                | Yes   |
| 10) State mitigation grant programs (e.g. NYSDEC, NYCDEP)            | Yes   |
| 11) Other  |   |

#### E.4) Community Classifications

| Program  | Classification | Date Classified |
|--|----------------|-----------------|
| Community Rating System (CRS)                        | NA             | NA              |
| Building Code Effectiveness Grading Schedule (BCEGS) | NA             | NA              |
| Public Protection                                    | NA             | NA              |
| Storm Ready  | NA             | NA              |
| Firewise   | NA             | NA              |

N/A = Not applicable. NP = Not participating. - = Unavailable.

The classifications listed above relate to the community's effectiveness in providing services that may impact its vulnerability to the natural hazards identified. These classifications can be viewed as a gauge of the community's capabilities in all phases of emergency management (preparedness, response, recovery and mitigation) and are used as an underwriting parameter for determining the costs of various forms of insurance. The CRS class applies to flood insurance while the BCEGS and Public Protection classifications apply to standard property insurance. CRS classifications range on a scale of 1 to 10 with class one (1) being the best possible classification, and class 10 representing no classification benefit. Firewise classifications include a higher classification when the subject property is located beyond 1000 feet of a creditable fire hydrant and is within 5 road miles of a recognized Fire Station.

Criteria for classification credits are outlined in the following documents:

- The Community Rating System Coordinators Manual
- The Building Code Effectiveness Grading Schedule
- The ISO Mitigation online ISO's Public Protection website at <http://www.isomitigation.com/ppc/0000/ppc0001.html>
- The National Weather Service Storm Ready website at <http://www.weather.gov/stormready/howto.htm>
- The National Firewise Communities website at <http://firewise.org/>

#### F.) MITIGATION STRATEGY

##### F.1) Past Mitigation Actions/Status

As a result of the 2006 flood event, the Town applied for a property acquisition grant offered by NYS and FEMA. Through this program the Town bought out eight homes in the Canon Hole Area. By this action, the area returns forever green, which will reduce the amount of dollars needed to rebuild these homes after every flooding event, and follows the emphasis placed by FEMA mitigation projects.

The Town also works with the Soil and Water Conservation District (SWCD) for assistance with stream restoration projects and all associated activities. The Town has a road ditch maintenance program and the Town Highway Superintendent has attended training held by the SWCD for Environmentally Sensitive Maintenance of Streams as well as utilizes the SWCD's hydroseeder for road bank stabilization projects.

The Town Highway Department also renews yearly a Memorandum of Understanding (MOU) with NYSDEC to conduct routine stream maintenance above and below critical infrastructure (such as culverts and bridges).

Additional projects include the formation of wetlands and retention ponds in the Cayuta Creek in Chemung County. Although this is not in Tioga County, it is retaining water that would be flooding into Tioga County and causing damage in the Town of Barton, as well as, the Village of Waverly. Along with these wetlands, the Upper Susquehanna Coalition has established a collection of rain and stream gauges to collect data to judge the effectiveness of these wetlands.

The following mitigation projects included in the 2006 plan have been completed and have been excluded from the Town Mitigation strategy.

| 2006 Mitigation Project   | Status      | Action   |
|---|-------------|--|
| Erosion of Old Barton Road – River bank stabilization needed Construction In Progress FEMA and SEMO funding received; permits awarded and worked started in 2007.   | Complete    | None   |
| Canon Hole Area – buyouts of homes that have frequent flooding. In Progress 8 homes approved in FEMA buyout after June 2006 event   | Complete    | None   |
| Ellis & Butson Creek – removal of woody debris and gravel.<br>Town received emergency permits after June 2006 flood event to remove gravel from the mouth of Butson Creek; material being used for stabilization project on Old Barton Road, Canon Hole Area. | Complete    | None   |
| Cayuta Creek – streambank erosion and gravel deposition are primary concerns.<br>Streambank erosion needed north and south of Main Street in Lockwood.  | 0% complete | Recommendation: Have area evaluated by SWCD for preliminary design ideas. Potential funding source may include NYS DEC Water Quality Improvement Projects (50-50 cost share) |

**F.2) Hazard Vulnerabilities Identified**

It is estimated that in the Town of Barton, 440 residents live within the 1% annual chance flood area (NFIP Special Flood Hazard Area). Of the municipality's total land area, 5% is located within the 1% annual chance flood area. \$191,092,000 (47.1%) of the municipality's general building stock replacement cost value (structure and contents) is located within the 1% annual chance flood area.

There are 36 NFIP policies in the community and there are 20 policies located within the 1% annual chance flood area. FEMA has identified 1 Repetitive Loss (RL) including 0 Severe Repetitive Loss (SRL) properties in the municipality.

## NFIP Summary

| Municipality | # Policies (1) | # Claims (Losses) (1) | Total Loss Payments (2) | # Rep. Loss Prop. (1) | # Severe Rep. Loss Prop. (1) | # Policies in 100-year Boundary (3) | # Policies in 500-year Boundary (3) | # Policies Outside the 500-year Flood Hazard (3) |
|--------------|----------------|-----------------------|-------------------------|-----------------------|------------------------------|-------------------------------------|-------------------------------------|--|
| Barton (T)   | 36             | 74                    | \$1,188,893             | 1                     | 0                            | 20                                  | 20                                  | 16   |

Source:

- (1) Policies, claims, repetitive loss and severe repetitive loss statistics provided by FEMA Region 2, in April 2012 using the "Comm\_Name". These statistics are current as of January 31, 2012. Please note the total number of repetitive loss properties includes the severe repetitive loss properties.
- (2) Total building and content losses from the claims file provided by FEMA Region 2 (current as of January 31, 2012).
- (3) The policy locations used are based on the latitude and longitude provided by FEMA Region 2.

HAZUS-MH estimates that for a 1% annual chance flood, \$9,205,000 (2.3%) of the municipality's general building stock replacement cost value (structure and contents) will be damaged, 460 people may be displaced, 158 people may seek short-term sheltering, and an estimated 2023 tons of debris could be generated. HAZUS-MH estimates the following damage and loss of use to critical facilities in the community as a result of a 1% annual chance flood event:

| Name                | Type | Exposure |            | Potential Loss from 1% Flood Event |                 |
|---------------------|------|----------|------------|------------------------------------|-----------------|
|                     |      | 1% Event | 0.2% Event | Structure Damage                   | Content Damages |
| Lockwood            | EOC  | X        | X          | 12.16                              | 55.78           |
| Lockwood            | Fire | X        | X          | 12.16                              | 55.78           |
| Barton Highway Barn | UDF  | X        | X          | 12.15                              | 49.09           |

Please refer to the Hazard Profiles for additional vulnerability information relevant to this jurisdiction.

F.3) PROPOSED HAZARD MITIGATION INITIATIVES

Note some of the identified mitigation initiatives in Table F are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities.

| Initiative                      | Mitigation Initiative   | Applies to New and/or Existing Structures* | Hazard(s) Mitigated | Goals and Objectives Met | Lead and Support Agencies                        | Estimated Benefits | Estimated Cost | Sources of Funding  | Timeline                   | Priority | Mitigation Category |
|---------------------------------|---|--|---------------------|--------------------------|--|--------------------|----------------|---|----------------------------|----------|---------------------|
| 1<br>(Carryover from 2006 Plan) | Cayuta Creek – streambank erosion and gravel deposition are primary concerns.<br>• Streambank erosion mitigation needed north and south of Main Street in <b>Lockwood</b> .<br>Recommendation: Have area evaluated by SWCD for preliminary design ideas | NA   | Flood               | 1-1, 4-1, 4-4            | Highway Dept with support from SWCD              | High               | High           | NYS DEC Water Quality Improvements Projects<br>50% cost share | Short                      | High     | NR                  |
| 2                               | Canon Hole Area – apply for 20 homes to be bought out.  | Existing                                   | Flood               | 1-2, 1-3, 1-9, 5-1       | Town Supervisor                                  | High               | \$1.5 Million  | HMGP  | Short                      | High     | PP                  |
| 3                               | Mitigate Bridge on Barton Road to improve access to area by school buses, trucks, emergency responders  | Existing                                   | Flood               | 1-1, 6-2                 | Highway Dept                                     | High               | High           | HMGP  | Short                      | High     | SP                  |
| 4                               | Norris Drive Stormwater Project. Install diversion ditch to eliminate flooding to surrounding properties  | Existing                                   | Flood               | 1-1, 1-2                 | Supervisor & Highway Dept with support from SWCD | Medium             | Medium         | HMGP  | Short; if received funding | Medium   | SP                  |
| 5                               | Foster Road over Ellis Creek Culvert mitigation. Current culvert pipe is not correct size need to mitigate to hydrologic analysis   | Existing                                   | Flood               | 1-1, 1-2                 | Highway Dept with support from SWCD              | High               | High           | HMGP  | Short                      | High     | SP                  |
| 6                               | Foster Road Streambank Stabilization Project  | Existing                                   | Flood               | 1-1, 4-1, 4-4            | Highway Dept with Support from NRCS and SWCD     | \$570,000          | High           | EWP and ESD Grant   | Short                      | High     | NR                  |

|            | on FEMA-154 "Rapid Visual Screening of Buildings for Potential Seismic Hazards" methodologies). It is recognized that these programs will need to be initiated and supported at the County and/or State level, and will require training, tools and funding provided at the county, state and/or federal level. |  |                     |                          |                           |                    |                |  |               |          |                     |
|            | See above.  | Existing                                   | All Hazards         | 1-3, 1-6, 1-7, 2-3, 2-5  | HMP Coordinator           | Medium-High        | Medium-High    | Mitigation grant programs (PDM or HMGP) with local match | Long term DOF | Medium   | PP                  |

**Notes:**

\*Does this mitigation initiative reduce the effects of hazards on new and/or existing buildings and/or infrastructure? Not applicable (NA) is inserted if this does not apply.

**Costs:**

Where actual project costs have been reasonably estimated:

- Low = < \$10,000
- Medium = \$10,000 to \$100,000
- High = > \$100,000

Where actual project costs cannot reasonably be established at this time:

- Low = Possible to fund under existing budget. Project is part of, or can be part of an existing on-going program.
- Medium = Could budget for under existing work-plan, but would require a reapportionment of the budget or a budget amendment, or the cost of the project would have to be spread over multiple years.
- High = Would require an increase in revenue via an alternative source (i.e., bonds, grants, fee increases) to implement. Existing funding levels are not adequate to cover the costs of the proposed project.

**Benefits:**

Where possible, an estimate of project benefits (per FEMA’s benefit calculation methodology) has been evaluated against the project costs, and is presented as:

- Low = < \$10,000
- Medium = \$10,000 to \$100,000
- High = > \$100,000

Where numerical project benefits cannot reasonably be established at this time:

- Low = Long term benefits of the project are difficult to quantify in the short term.
- Medium = Project will have a long-term impact on the reduction of risk exposure to life and property, or project will provide an immediate reduction in the risk exposure to property.
- High = Project will have an immediate impact on the reduction of risk exposure to life and property.

**Potential Funding Sources:**

- ACOE = US Army Corps of Engineers
- CBDG = Community Development Block Grants
- DEC = NY Department of Environmental Conservation
- DHSES=Department of Homeland Security Emergency Services
- EMPG = Emergency Management Planning Grant
- EWP = Emergency Watershed Protection Grants (NRCS)
- FMA = Flood Mitigation Assistance Grant Program (FEMA)

HLS = Homeland Security Programs  
HMGP= Hazard Mitigation Grant Program (FEMA)  
HMA = Hazard Mitigation Assistance (FEMA)  
NOAA= National Oceanic and Atmospheric Association  
PDM = Pre-Disaster Mitigation Grant Program (FEMA)  
RFC = Repetitive Flood Claims Grant Program  
SHSP = State Homeland Security Program Grant  
SRL = Severe Repetitive Loss Grant Program (FEMA)  
WQIP = Water Quality Improvement Project Program (NYSDEC)

**Timeline:**

Short = 1 to 5 years. Long Term= 5 years or greater. OG = On-going program.  
DOF = Depending on funding.

**Notes (for Mitigation Type):**

1. PP=Prevention and Property Protection: Government, administrative or regulatory actions or processes that influence the way land and buildings are developed and built. These actions also include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations and acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.
2. PE=Public Education and Awareness: Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and school-age and adult education programs.
3. NR=Natural Resource Protection: Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.
4. SP=Structural Projects: Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.
5. ES=Emergency Services: Actions that protect people and property, during and immediately following, a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities.

## G.) PRIORITIZATION OF MITIGATION INITIATIVES

| Initiative # | # of Objectives Met | Benefits                                | Costs                                   | Do Benefits equal or exceed Costs?<br>(Yes or No) | Is project Grant eligible?<br>(Yes or No) | Can Project be funded under existing programs/budgets?<br>(Yes or No) | Priority<br>(High, Med., Low) |
|--------------|---------------------|---|---|---|---|---|-------------------------------|
| 1            | 3                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 2            | 4                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 3            | 2                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 4            | 2                   | Medium                                  | Medium                                  | Yes   | Yes                                       | Yes   | Medium                        |
| 5            | 2                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 6            | 3                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 7            | 3                   | High                                    | High                                    | Yes   | Yes                                       | Yes   | High                          |
| 8            | 5                   | High                                    | Low -<br>Medium                         | Yes   | No  | Yes   | High                          |

Notes: H = High. L = Low. M = Medium. N = No. N/A = Not applicable. Y = Yes.

**Explanation of Priorities**

High Priority = A project that meets multiple objectives (i.e., multiple hazards), benefits exceeds cost, has funding secured or is an on-going project and project meets eligibility requirements for the Hazard Mitigation Grant Program (HMGP) or Pre-Disaster Mitigation Grant Program (PDM) programs. High priority projects can be completed in the short term (1 to 5 years).

Medium Priority = A project that meets goals and objectives, benefits exceeds costs, funding has not been secured but project is grant eligible under, HMGP, PDM or other grant programs. Project can be completed in the short term, once funding is completed. Medium priority projects will become high priority projects once funding is secured.

Low Priority = Any project that will mitigate the risk of a hazard, benefits do not exceed the costs or are difficult to quantify, funding has not been secured and project is not eligible for HMGP or PDM grant funding, and time line for completion is considered long term (1 to 10 years). Low priority projects may be eligible other sources of grant funding from other programs. A low priority project could become a high priority project once funding is secured as long as it could be completed in the short term.

Prioritization of initiatives was based on above definitions: Yes

Prioritization of initiatives was based on parameters other than stated above: Not applicable.

**H.) FUTURE NEEDS TO BETTER UNDERSTAND RISK/VULNERABILITY**

None at this time.

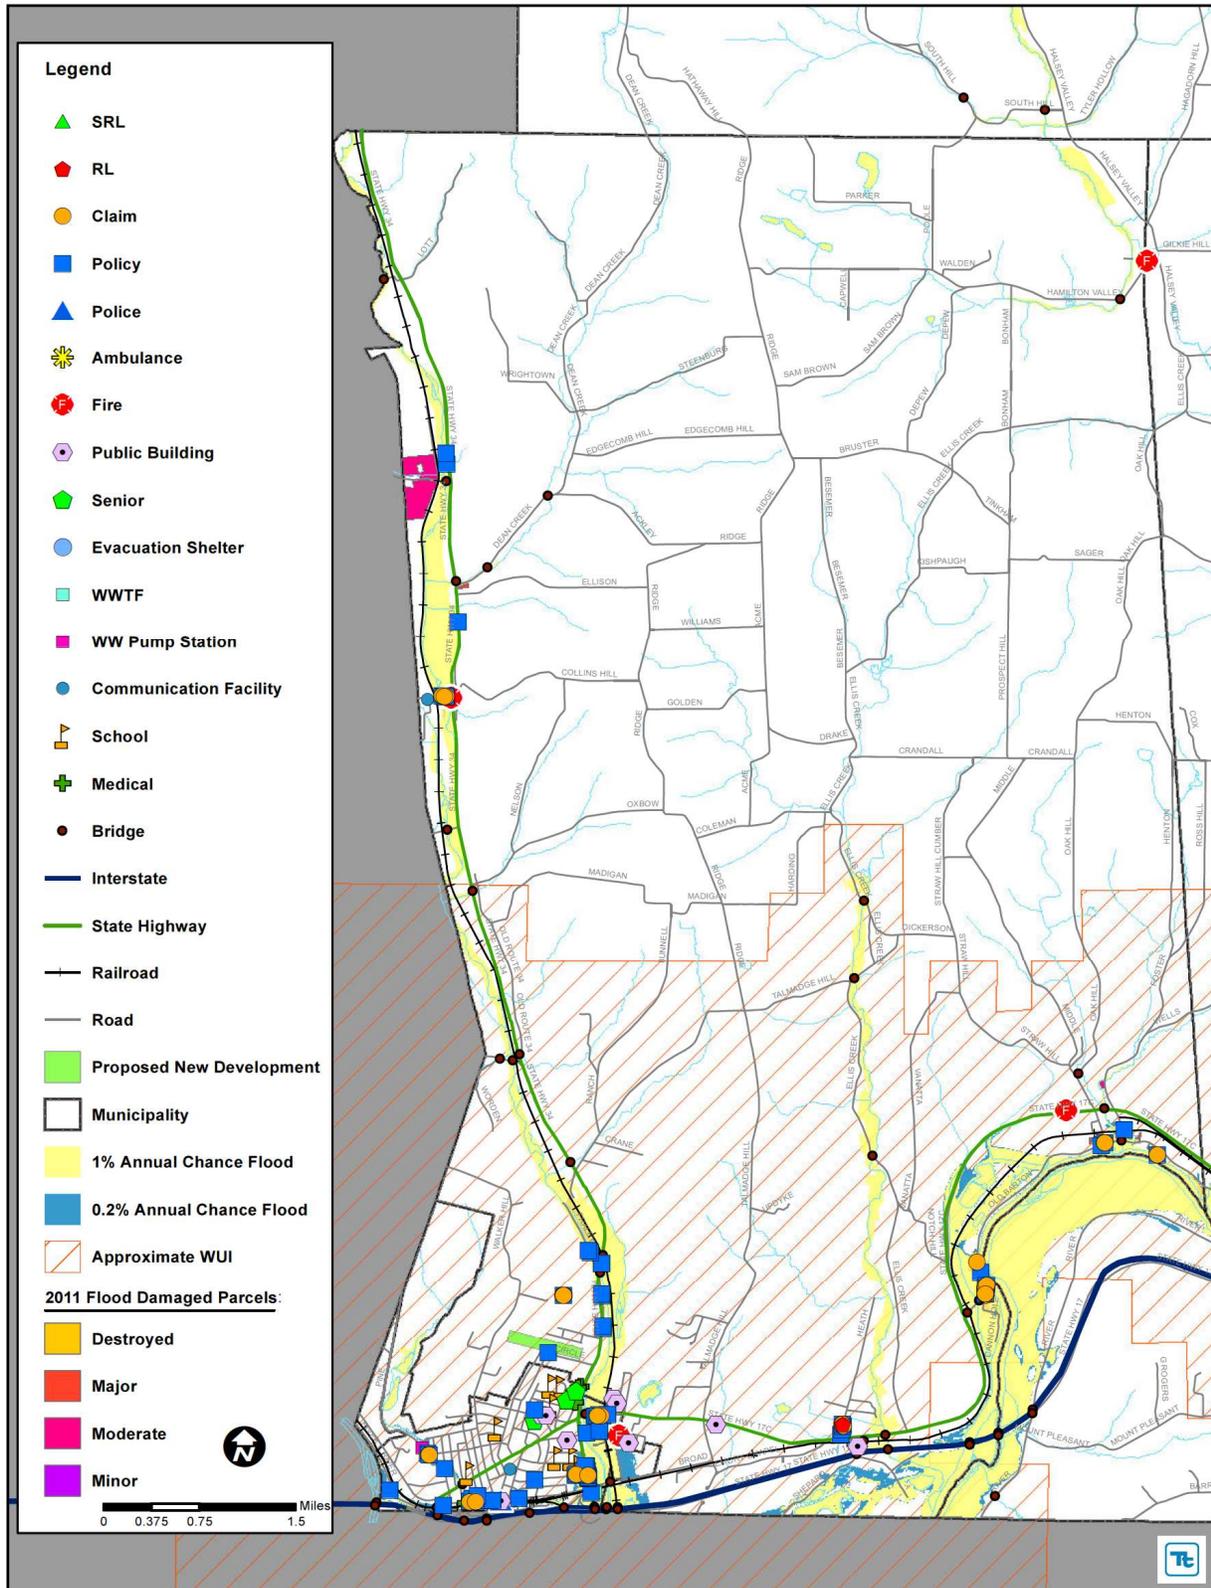

**I.) HAZARD AREA EXTENT AND LOCATION**

A hazard area extent and location map has been generated for the Town of Barton to illustrate the probable areas impacted within the Town of Barton and is provided on the next page. This map is based on the best available data at the time of the preparation of this Plan, and is considered to be adequate for planning purposes. Maps have only been generated for those hazards that can be clearly identified using mapping techniques and technologies, and for which the Town of Barton has significant exposure. The Planning Area maps are provided in the hazard profiles within Section 5.4, Volume I of this Plan.

**J.) ADDITIONAL COMMENTS**

No additional comments at this time.

Figure 9.2-1. Town of Barton Hazard Area Extent and Location Map

Sources: FEMA, 2011

Notes: NFIP = National Flood Insurance Program. RL = Repetitive Loss. SRL = Severe Repetitive Loss. The entire municipality is vulnerable to the following hazards: drought, earthquake, severe storm, and severe winter storm.
