AGE AND SEX

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Barton town, Tioga County, New York				
	Total		Male		Female
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
Total population	8,802	+/-24	4,193	+/-148	4,609
AGE					
Under 5 years	7.0%	+/-1.8	6.7%	+/-2.0	7.3%
5 to 9 years	5.3%	+/-1.2	5.0%	+/-1.5	5.6%
10 to 14 years	6.1%	+/-1.3	7.1%	+/-2.0	5.2%
15 to 19 years	5.7%	+/-1.3	6.5%	+/-1.8	5.0%
20 to 24 years	6.1%	+/-1.5	4.4%	+/-1.7	7.7%
25 to 29 years	5.6%	+/-1.5	5.9%	+/-2.0	5.3%
30 to 34 years	5.6%	+/-1.4	5.6%	+/-1.6	5.5%
35 to 39 years	5.4%	+/-1.5	6.1%	+/-1.9	4.7%
40 to 44 years	8.0%	+/-1.8	9.5%	+/-2.7	6.6%
45 to 49 years	7.5%	+/-1.6	6.2%	+/-1.7	8.7%
50 to 54 years	8.9%	+/-1.5	7.0%	+/-2.0	10.6%
55 to 59 years	7.2%	+/-1.6	7.9%	+/-2.1	6.5%
60 to 64 years	7.6%	+/-1.3	9.1%	+/-1.9	6.3%
65 to 69 years	3.9%	+/-1.0	4.2%	+/-1.4	3.6%
70 to 74 years	3.6%	+/-0.9	2.9%	+/-1.2	4.1%
75 to 79 years	2.2%	+/-0.9	2.2%	+/-1.0	2.2%
80 to 84 years	1.9%	+/-0.8	2.1%	+/-1.3	1.6%
85 years and over	2.5%	+/-0.8	1.5%	+/-0.8	3.5%
SELECTED AGE CATEGORIES					
5 to 14 years	11.4%	+/-1.5	12.1%	+/-2.2	10.7%
15 to 17 years	4.4%	+/-1.1	4.9%	+/-1.6	3.9%
18 to 24 years	7.5%	+/-1.6	6.0%	+/-1.9	8.8%
15 to 44 years	36.4%	+/-2.0	38.0%	+/-3.0	34.9%
16 years and over	80.7%	+/-1.8	80.5%	+/-2.5	80.8%

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The age dependency ratio is derived by dividing the combined under-18 and 65-and-over populations by the 18-to-64 population and multiplying by 100.

The old-age dependency ratio is derived by dividing the population 65 and over by the 18-to-64 population and multiplying by 100.

The child dependency ratio is derived by dividing the population under 18 by the 18-to-64 population and multiplying by 100.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Barton town, Tioga County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSING OCCUPANCY				
Total housing units	3,808	+/-186	3,808	(X)
Occupied housing units	3,605	+/-182	94.7%	+/-2.8
Vacant housing units	203	+/-109	5.3%	+/-2.8
Homeowner vacancy rate	0.0	+/-1.3	(X)	(X)
Rental vacancy rate	1.8	+/-2.7	(X)	(X)
UNITS IN STRUCTURE				
Total housing units	3,808	+/-186	3,808	(X)
1-unit, detached	2,386	+/-194	62.7%	+/-4.0
1-unit, attached	0	+/-17	0.0%	+/-0.8
2 units	436	+/-115	11.4%	+/-2.9
3 or 4 units	217	+/-92	5.7%	+/-2.4
5 to 9 units	154	+/-78	4.0%	+/-2.0
10 to 19 units	26	+/-25	0.7%	+/-0.6
20 or more units	113	+/-43	3.0%	+/-1.1
Mobile home	476	+/-103	12.5%	+/-2.7
Boat, RV, van, etc.	0	+/-17	0.0%	+/-0.8
YEAR STRUCTURE BUILT				
Total housing units	3,808	+/-186	3,808	(X)
Built 2010 or later	41	+/-33	1.1%	+/-0.9
Built 2000 to 2009	345	+/-106	9.1%	+/-2.7
Built 1990 to 1999	283	+/-82	7.4%	+/-2.2
Built 1980 to 1989	346	+/-92	9.1%	+/-2.4
Built 1970 to 1979	427	+/-123	11.2%	+/-3.1
Built 1960 to 1969	222	+/-84	5.8%	+/-2.2
Built 1950 to 1959	314	+/-103	8.2%	+/-2.7
Built 1940 to 1949	170	+/-76	4.5%	+/-2.0
Built 1939 or earlier	1,660	+/-170	43.6%	+/-3.8
ROOMS				
Total housing units	3,808	+/-186	3,808	(X)
1 room	51	+/-44	1.3%	+/-1.2
2 rooms	70	+/-65	1.8%	+/-1.7

Subject	Barton town, Tioga County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
3 rooms	200	+/-90	5.3%	+/-2.3
4 rooms	425	+/-121	11.2%	+/-3.1
5 rooms	656	+/-126	17.2%	+/-3.2
6 rooms	872	+/-174	22.9%	+/-4.5
7 rooms	480	+/-125	12.6%	+/-3.1
8 rooms	472	+/-121	12.4%	+/-3.2

Not computed	0	+/-17	(X)	(X)
Housing unit without a mortgage (excluding units where SMOCAPI cannot be computed)	1,088	+/-166	1,088	(X)
Less than 10.0 percent	428	+/-102	39.3%	+/-7.7
10.0 to 14.9 percent	240	+/-87	22.1%	+/-6.8
15.0 to 19.9 percent	108	+/-50	9.9%	+/-4.6

Subject	Barton town, Tioga County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
20.0 to 24.9 percent	90	+/-46	8.3%	+/-4.1
25.0 to 29.9 percent	16	+/-18	1.5%	+/-1.6
30.0 to 34.9 percent	93	+/-52	8.5%	+/-4.5
35.0 percent or more	113	+/-57	10.4%	+/-5.0
Not computed	10	+/-14	(X)	(X)
GROSS RENT				
Occupied units paying rent	1,093	+/-160	1,093	(X)
Less than \$200	9	+/-14	0.8%	+/-1.3
\$200 to \$299	51	+/-31	4.7%	+/-2.8
\$300 to \$499	258	+/-108	23.6%	+/-8.6
\$500 to \$749	448	+/-129	41.0%	+/-10.1
\$750 to \$999	229	+/-72	21.0%	+/-7.2
\$1,000 to \$1,499	88	+/-68	8.1%	+/-5.9
\$1,500 or more	10	+/-15	0.9%	+/-1.3
Median (dollars)	617	+/-51	(X)	(X)
No rent paid	70	+/-45	(X)	(X)
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	1,079	+/-159	1,079	(X)
Less than 15.0 percent	175	+/-101	16.2%	+/-8.6
15.0 to 19.9 percent	84	+/-40	7.8%	+/-3.7
20.0 to 24.9 percent	145	+/-95	13.4%	+/-8.4
25.0 to 29.9 percent	169	+/-80	15.7%	+/-7.4
30.0 to 34.9 percent	77	+/-52	7.1%	+/-4.9
35.0 percent or more	429	+/-125	39.8%	+/-10.6
Not computed	84	+/-52	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

The 2007, 2008, 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
