**WILDLIFE PACS**

*All stock 12-24" unless otherwise noted*

BIRD/BUTTERFLY PAC – 2 each: Elderberry, Liatris Spicata, Ninebark, Butterfly bush (root) and Apricot Beauty Daylily (root).	\$22/Pac		
NATIVE FLOWERING TREE & SHRUB PAC – 2 each: Eastern Redbud, Black chokeberry, Elderberry, Nannyberry, and Wh. Flowering dogwood	\$22/Pac		
ORNAMENTAL FLOWERING PAC –2 each: Forsythia, Lilac, Ninebark Rose of Sharon, W.F. Dogwood	\$22/Pac		
WILDLIFE NUT TREE PAC – 2 each: Chinquapin oak, Swamp White Oak, Pin Oak, Sawtooth oak and Red oak.	\$22/Pac		
HOMEOWNERS PAC - 10 Blue spruce, 2 Sugar maple, 2 Eastern Redbud 4 Native birch, 2 Witch Hazel and 5 Austrian pine	\$25/Pac		
POND HABITAT PAC (NEW) – 2 each: Red Osier Dogwood, Buttonbush, Willow Sycamore, River Birch	\$22/Pac		

**GROUND COVERS**

LIATRIS SPICATA	10/\$14		
PACHYSANDRA	10/\$14 or 50/\$40		
DAYLILY, Apricot Beauty (Heavy one fan division)	10/\$15		
HOSTA PAC- Ventricosa, Hyacinthina, Albo Marginata, F. Aureo Marginata, Undulata Varigata	\$22/Pac		

**WILD FERNS and FLOWERS**

FERN PAC-2 each of Cinnamon, Christmas, Ostrich, Maidenhair & New York	\$22/pac		
PERENNIAL FLOWER PAC-2 each: Dream Baby Daylily & Francis Fay daylily , Blue king iris, Snow queen iris, Autumn Joy Sedum	\$22/pac		

**WILDLIFE BERRIES**

BLUEBERRY – Bluecrop, Mid-season, 5-12" rooted cutting	10/\$25.00		
BLACKBERRY, Darrow – 1-2' rooted cutting	10/\$28.00		
RASPBERRY, Boyne – 9-15+" rooted cutting	10/\$28.00		
EDIBLE FRUIT PAC – 2 each Jersey blueberry, Blue Ray blueberry, Raspberry, blackberry, strawberry	\$35/pac

 183 Corporate Drive, Owego, NY 13827  
 Phone (607) 687-3553/2240

## WILDLIFE FRUIT TREES

Good for wildlife area or informal orchard. All Edible. No varieties guaranteed. 2 varieties are needed for pollination

APPLE – 3-6’ grafted Dwarf or Semi- dwarf, Early, Mid, or Late season	1/\$10.00		
PEAR- 3-6’ grafted tree, Early, Mid, or Late season	1/\$10.00		

### PLANTING SUPPLIES

**QUANTITY    AMOUNT**

SLOW RELEASE FERTILIZER TABLETS - 20-10-5 analysis, 10 grams each \$1.00 / 10 or 1,000 / case @ \$82.00/case		
MARKING FLAGS - 4"x5" fluorescent Pink plastic on 30" long 15 1/2 gauge wire staff \$1.00 / 10 - \$9.00 / 100		
PLANTING BAR - For rocky soils, 39" overall length, weighs 10 lbs.	\$62.00	
MIRACLE TUBE TREE SHELTERS – 5' high X 3 ¼" -4 ½" diam. nested tubes. 5 for \$18.00 Great for deer protection and acts like a mini greenhouse.		

If ordering trees and shrubs please put this total on that form **TOTAL** \_\_\_\_\_

**ORDERING EARLY HELPS INSURE THAT WE CAN SUPPLY THE SPECIES YOU WANT BUT YOU ARE STILL NOT GAURENTEED YOUR ORDER. WE WILL TRY OUR BEST TO COMPLETE EVERY ORDER**

Stock for the Conservation Planting Program was ordered in October 2019 based on species and numbers sold over the last 2-3 years.

The District reserves the right to refund payment if species is unavailable

Generally we can obtain additional evergreen stock if demand exceeds our original order.

Deciduous species are more difficult to obtain if demand exceeds our original order.

Order large quantities, 100 or more, before March 2020 to better insure availability

**Pick up dates are Friday April 17<sup>th</sup> 8:30am to 5:00pm and Saturday April 18<sup>th</sup> 8am to 10am at Tioga County Soil and Water Conservation,**

**183 Corporate Drive, Owego, NY 13827**

**Additional copies of this order form can be found on our website at [www.tiogacountyny.com/programs-agencies/soil-and-water/](http://www.tiogacountyny.com/programs-agencies/soil-and-water/)**

**SPECIES DESCRIPTIONS CAN ALSO BE FOUND ON OUR WEBSITE**

# TIOGA COUNTY SOIL AND WATER CONSERVATION DISTRICT – 2020 TREE AND SHRUB PROGRAM

## INFORMATION and SPECIES DESCRIPTIONS

*The District reserves the right to offer substitutions or refund payment on species if unavailable. The District will NOT be responsible for the success or failure of plantings.*

All species are bare rootstock. Evergreen seedlings have grown entirely in their original seedbed and are 3-0 stock, three years in the seedbed. Transplants have been transplanted from the seedbed to a transplant bed. This allows the plant to grow a denser root system, more branching and a thicker stem. Fraser fir are 3-2 transplants. This means 3 years in a seedbed and 2 years in a transplant bed. Northern white cedar & Spruces are 2-2 transplants. Canaan and Balsam Fir are 3-1 transplants. Deciduous seedlings are 1-0 or 2-0 stock.

### EVERGREENS

**AUSTRIAN PINE** - Native to Europe. A tree that grows to a height of 50 feet. Grows well on a variety of soils. Needles are dark green, stiff, grow in clusters of two, and are from 3 to 6 inches long. It is a very attractive ornamental. It is an excellent windbreak because of its stiff branches.

**WHITE PINE** – Largest of the Northeast conifers. 80 to 100' in height. 3-5" long dark bluish green needles are slender and flexible. Can grow 2'+ per year on preferred sandy loam soil. Valuable softwood timber. Can be pruned for Christmas trees.

**BLUE SPRUCE** - Native to the Central Rocky Mountains. Needles are approximately 1 inch long and very sharp. It requires a more fertile, well-drained site than white spruce and prefers south and east slopes. It is used mostly as an ornamental and to a lesser degree, as a Christmas tree.

**NORWAY SPRUCE** - A native of Europe. Needles are dark green, ¾ to 1 inch long. Grows well on a variety of soils. However, the first five years of growth are very slow. It is not recommended for Christmas trees because the needles drop quickly. Used mostly for ornamentals and in windbreaks.

**WHITE SPRUCE** - Native to northern New York and Canada. Grows well on a variety of soils. Needles are short 1/3 to ¾ inches long, and somewhat blue-green in color. When open grown as an ornamental it develops a handsome conical growth, which extends nearly to the ground. Used as Christmas trees, in windbreaks, and as ornamentals.

**NORTHERN WHITE CEDAR** - Leaves are yellow/green in color. Young leaves on new shoots are ½ inch long and pointed. Leaves on lateral branches are flattened and scale-like. Grows on a wide variety of soils from very wet to very dry.

**BALSAM FIR** - Native to northern New York and Canada. Needles are ¾ to 1½ inches long, dark, and shiny green above. Cones grow upright. It prefers a well-drained soil, and north and east slopes. It is widely used as a Christmas tree and an ornamental. Caution: it is very susceptible to late spring frosts, avoid dry sites.

**CONCOLOR FIR** - Also called White Fir. It is a native of the western US. It grows well on both dry and wet sites. Needles are yellow/green but have a

bluish cast in the first few months of growth. Needles are 1 to 3 inches long. It tolerates shade well and is excellent as an ornamental or a Christmas tree. Caution: It has a very deep taproot, plant only on deep soils. It is also very susceptible to late spring frosts, plant only on higher elevations.

**BLACK HILLS SPRUCE** – Native to South Dakota. Another variety of the white spruce but some experts say it's ornamentally superior to the standard white spruce. Grows to a height of 30-60' in full sun or partial shade. Grows best in acidic, moist, gravelly, loam, or fine clay soils. Makes a nice windbreak

**FRASER FIR** - Native to the Appalachian Mountains. Needles are 1/2 to 1 inch long, dark green above and silvery white beneath, and crowded on the upper side of the twig. It's an excellent Christmas tree, a fast grower when young, and grows to a height of 30 to 40 feet. Likes well drained cool, moist soil. Prefers north and east slopes. Least affected by late spring frosts. Does poorly on hot, dry sites. May not survive extreme droughty conditions.

**CANAAN FIR**- Native to isolated pockets in West Virginia. Similar to both Fraser and Balsam fir. Will tolerate wetter soils and resistant to spring frost. 40- 55ft high. Best grown in deep, well drained loam with ample moisture.

### DECIDUOUS

**EASTERN REDBUD** – Known as the harbinger of spring. Tree is considered a flowering and ornamental tree growing to a height of 20-30' and a spread of 25 – 35'. Begins flowering at a young age (~4 years) with rosy pink flowers in April. Full sun or partial shade and grows well in most soils.

**TULIP TREE** – Also called a yellow poplar. Noted for its tulip like flowers that are yellow with an orange band at the base. Flowers are followed by long, oblong, brown shaped fruits. 60 to 90' in height and a 30 to 50' spread. Full sun to partial shade. Grows best in moist, organically rich well drained soils.

**DOMESTIC APPLE** - Common apple variety. Full size apple tree will produce fruit 1½ -2½" in diameter. Deer and other wildlife will eat fruit.

**BIRCH, NATIVE WHITE** - Reaches a mature height of 50 ft. Plant in clumps or singly. White bark appears in 3-4 years. Prefers moist, moderately well drained soil. Fall foliage: yellow.

**RIVER BIRCH**- Naturally grown on riverbanks but can be grown just about anywhere. 40-70' height. Fast growing. Full sun to partial shade is best. Good erosion control

**BUTTON BUSH** – Deciduous shrub. 6-12' in height. Grows well in wet soils. Very easy to grow with minimal maintenance. Excellent for wildlife. Full sun to part shade is best.

**BLACK CHERRY** - Highly valued timber tree growing 60-70 ft. Small cherries are used by wildlife.

**BLACK TUPELO** – Great landscaping tree with vibrant fall colors. Grows to a height of 30-50' and a spread of 20-30'. Full sun to partial shade are best. Provides fruit for birds and nutrition for bees in late spring.

**AMERICAN CRANBERRY BUSH** – Fast growing shrub up to 15'. White flowers in flat clusters in May, glossy scarlet fruit clusters from Sept-May, glossy red foliage in autumn. Good for background

screen and wildlife habitat in any soils; sunlight to shade. Used by 34 species of birds.

**SHAGBARK HICKORY**- 60'-80'. Bark hangs in long strips on older trees. Edible nut in thick green husk. Thrives in full sun and rich, well drained loam.

**RED OSIER DOGWOOD** – 7-9' erect shrub with dark red winter stems. Yellowish white flowers in May. Full sun to partial shade. Prefers wet soils. Birds are very attracted to the fruit and for shelter. Good for erosion control

**AMERICAN HAZELNUT**- or Filbert. Multi stemmed shrub growing 15-18' high. Annual abundant sweet nuts. Plant multiples to ensure pollination. Full sun to partial shade with well-drained soil. Drought tolerant

**WHITE FLOWERING DOGWOOD** - White flowers show their beauty in the spring, foliage turns a vibrant red-purple in fall and glossy red fruits attract wildlife. One of the favorite ornamentals in yards.

**WITCH HAZEL** – 10-30' height. Pest and disease resistant. Bright yellow fragrant flowers at about 6 years old. Prefers north facing slopes with semi shaded habitats. Regular watering required

**LILAC** – 8-12' leggy, upright shrub. Fragrant purple flowers in mid May.

**SWAMP WHITE OAK** – Grows to 60-80' as a nice shade tree. Typically grows on hydromorphic acidic soils in low lands by streams, ponds, etc. Great tree for wildlife with acorns dropping in the fall.

**RED OAK** - A fast growing oak, develops a short massive trunk when grown in the open. Produces acorns at 2-5 year intervals when mature. Grows 60-80 ft. tall and 2-3 ft. in diameter. Prefers deep, well-drained soil for best growth. Valuable timber tree. Fall foliage is deep red or orange.

**WHITE OAK** – 60' high slow growing tree. Grows well on most soils. Acorns great wildlife food, preferred over red oak. Valuable timber tree.

**CHINQUAPIN OAK**- 40-50' height. 1" acorns that mature in a single season and is at the top of the food preference for wildlife. Best in well-drained soil and full sun. Known to grow very straight which is good for lumber

**ROSE OF SHARON** –8-12' erect shrub or small tree with numerous upright branches. Flowers July – September with single or double flowers of purple, red, blue or white shades. Tolerates moist soils, full sun and wide pH range.

**SUGAR MAPLE** - Grows 70-100 ft. tall. Prefers well drained soils but will grow on a variety of soils. If open grown it develops a short trunk and a compact globular crown. Fall foliage is a brilliant yellow.

**RED MAPLE**- 40-60' Fast growing and tolerant of many soils. Full sun is best in well drained moist soils

**SYCAMORE** - Most massive tree in eastern North America grows to 75-100' with horizontal branching and a rounded habit. Grown around streams and rivers. Brown bark exfoliates in irregular pieces to reveal creamy white inner bark. 3-5 lobed medium to dark green leaves (4-10" wide) are similar to maple.

**BLACK WALNUT** – Grows over 60 ft. tall. Highly valued for its fine wood and edible nuts. Very site specific, prefers a moist, well-drained soil.

**STREAM-CO WILLOW** - 10' round dense shrub. This plant is used to stabilize stream banks and in making baskets. Great for wet areas. Does not root spread

## SPECIES SOLD ONLY IN PACS

**Not all species have descriptions in the Pacs. They are elsewhere in the description pages**

### Bird and Butterfly pac

**BUTTERFLY BUSH** - A multi-stemmed shrub growing 5-12 ft. high. Fragrant flowers in July through fall attract butterflies. Tolerates most soils. Should be pruned heavily in spring. Stock sold as a live root.

**ELDERBERRY** - 5-12' multi-stemmed shrub. White flowers in mid-June, purple fruit mid-August. Tolerates wet soils and roadside conditions. Stock sold as a live root.

**NINEBARK** - A 6-10' tall shrub with white cup shaped flower heads. Drought tolerant with little maintenance. Known for its rich purple foliage. Full sun to partial shade. Adaptable to many soils but best in acidic well drained soils.

### Native Flowering Pac

**BLACK CHOKEBERRY** - Part of the Rose family, this shrub prefers moist, well-drained, acidic soils however it will thrive in a wide variety of sites. This is an excellent plant for soil-gripping, rapid establishment, and fall foliage. It grows in full to partial sun. The plant will grow to about 8' tall and 8' wide.

### Ornamental Flowering Pac

**FORSYTHIA** - 8-10' upright and wide shrub. Yellow flowers in April for 2-3 weeks. Prefers loose soil but does well in any type. Full sun needed for maximum flower.

### Perennial Flower Pac

**DREAM BABY DAYLILY** - Compact but vigorous 18" high daylily has 3.5" light apricot blooms with a purple eye zone and a yellow-green throat. Early to mid-season bloom time.

**FRANCES FAY DAYLILY** - a 24" tall prolific mid-season bloomer with large & abundant 4" peachy white blossoms.

**BLUE KING IRIS** - forms an clump of tall deep green grass-like leaves, with royal blue flowers on 24-36" long stems that open above the foliage. Easy to grow and hardy. Clumps return dependably each year with more and more flowers.

**SNOW QUEEN IRIS** - Regal white flowers with a touch of golden yellow on 30" stems. Blossoms in May and June framed by blue green foliage. Crisp, grassy foliage stays neat looking all season.

**AUTUMN JOY SEDUM** - A 1-2' high clump-forming plant (roughly 2' x 2') with succulent foliage. Broccoli like flowers form in July in 3" heads. In August, the flowers start to turn pink. Slowly the flowers turn red, and later in fall they turn a deeper rusty-red. The leaves are sometimes variegated and range in color from bluish-green or greenish-yellow to reddish-pink or almost off-white.

### Nut Tree Pac

**PIN OAK** - A medium sized red oak that typically grows 50-70' tall with a broad pyramidal crown.

Rounded acorns to 1/2" long, are an important source of food for wildlife. Glossy, dark green leaves to 5" long typically have 5 lobes deeply cut close to the midrib. Leaves turn deep red in fall.

**SAWTOOTH OAK**- Height of 35' in 15 years. May produce nuts in 7-8 years, up to 125 pounds per tree. Grows in medium fertility, slightly acid, clayey, loamy and sandy soils. Fair drought, poor shade tolerance. Food for deer, wild turkey, squirrel and game birds.

**CHINQUAPIN OAK** - A perfect tree to a larger lawn or park. This medium to large sized oak has dark green leaves in the summer that turn yellow-orange in the fall. It produces 1" sweet acorns that mature in a single season and are a great food for many wildlife species. This tree will grow to 40-50' high with a 70-80' spread. It does best in well-drained soils but will adapt to other soil types.

### POND HABITAT PAC

**BUTTONBUSH** - A 6-12' wetland shrub. Balls of white flowers resembling pin cushions. 8" long ovate, narrow leaves with glossy upper surface. Shade tolerant, sandy to clay soils. Bees use shrub to make honey and birds and shorebirds consume the seeds.

**NINEBARK** - A 6-10' tall shrub with white cup shaped flower heads. Drought tolerant with little maintenance. Known for its rich purple foliage. Full sun to partial shade. Adaptable to many soils but best in acidic well drained soils.

**RED OSIER DOGWOOD** - 7-9' slender, upright shrub. It has a red stem and white drupe fruit in mid-August. Grows best in wet or swampy conditions. It is also a great structure for holding soil on sloped areas & stream banks.

**RIVER BIRCH**- Grows well in wet conditions and some dry. Rapid growth and considered a shade and ornamental. Height of 40'-70'. Full sun to partial shade. Great along rivers and streams to help with erosion.

### GROUNDCOVERS

**LIATRIS SPICATA** - Perennial in the sunflower and daisy family. Tall spikes of purple flowers that grow 1' to 5' high. Blooms from July to August. Full sun and well-drained soil but can tolerate some shade. Needs regular watering during first growing season.

**PACHYSANDRA** - Evergreen ground cover for use in borders, under trees and shrubs and as a lawn substitute in non-traffic areas. Plants 1 foot apart provide dense weed resistant groundcover in 1 to 2 years. Grows in wide range of soils; poor drought tolerance; does not grow well in full sun. Plant rooted cuttings 1 foot apart for rapid growth of dense cover. Clipping in spring stimulates new growth.

**DAY LILY - APRICOT BEAUTY** - apricot flowers with lightly ruffled edges. Flowers appear on naked stems that typically rise to 30" tall above a clump of arching, linear, blade-like, green leaves. Individual flowers open up for one day. Blooms in midseason June - July.

**HOSTA**- Perennial plant that root sprouts. Has dark green with irregular cream to white margins. Blooms July -August. Full sun to partial shade

### FERN PAC

**CINNAMON FERN** - 2-5' high non-evergreen fern. First foliage appears as Cinnamon sticks. Later producing deep waxy green leaves. Prefers acid soil, up in late April dormant in September.

**CHRISTMAS FERN** - Description: 1-2' height full evergreen dark green in color requires shade to partial shade. Prefers neutral to acid soils.

**MAIDENHAIR FERN** - 18" tall, delicate fern. Lacy, soft leaf grows rapidly. Cannot tolerate dry soils, prefers neutral and moist soils. Dies back in September

**NEW YORK FERN** - 18' semi-evergreen hardy fern. It likes dryer soils. Yellow-green leaves spread rapidly. This is a good groundcover, requires shade to partial sun

**OSTRICH FERN** - 3-6' Rich green fern. Light shade to partial sun preference. Applications along ponds and low wet areas ideal

### WILDLIFE BERRIES

**BLUEBERRY** - Bluecrop (Mid-season) blueberry is a medium sized fruit with a high sugar content. Self-pollinating, but cross pollination produces higher yields. Full sun and acidic soils recommended.

**BLACKBERRY** - Darrow variety. This plant produces large black fruit that is firm, fleshy, and sweet. Will produce over a long period of time. It is a very hardy and heavy producer. The root systems of this plant have great soil holding capacity.

**RASPBERRY** - NEW Boyne variety, early season variety that is winter hardy. Deep red medium consistent berries. Good for freezing and jam

### PLANTING SUPPLIES

**SLOW RELEASE FERTILIZER TABLETS** - These tablets supply the necessary nutrients to seedlings for 2-3 years. Use one per seedling, two per transplant. Tablets are placed in the hole, avoiding root contact, when planting. Tablets are 20-10-5 analysis (20% nitrogen, 10% phosphorous, 5% potassium), weight 10 grams. Can also be used to fertilize existing plantings.

**PLANTING BAR** - Used for planting seedlings. 39" long bar weighs 10 lbs. T handle, dual footsteps. Triangular, tapering pointed edge. Designed for stony soils.

**MIRACLE TUBE TREE SHELTERS** - Five 5' high shelters 3 1/4" - 5 1/2" diameter nested together for shipping. Ties for attaching to 6' stake (purchase separately) included. Can increase tree height growth up to 600% the first two years. Protects from deer and other critters.

**ORDER TREES &  
SHRUBS EARLY TO  
INSURE  
AVAILABILITY**
